

Assembly Instructions for DIY Solitary Bee Barn

Watch our live video instructions: https://www.youtube.com/watch?v=EPjRw9dO_5A&t=77s

The DIY kit needs to be assembled; use available supplies for putting it together (nails, screws, glue or staples (if you use screws, pre-drill the holes to prevent splitting the wood)).

Follow these easy steps for assembly:

1. Stain, oil or paint the pieces first, before assembly.
2. Join the 4 smaller wider pieces into a square box.
3. Fasten the two legs to the box (this join is a bit tricky as its on a 45 angle).
4. Attach the base to the legs.
5. Put the back on the box.
6. Lastly, attach the 4 roof boards flush with the back board.

Your barn should be built! You may wish to leave your barn just the way it is or finish it with a light sanding.
